

SCOPE OF WORK

Project: Honoapiilani Highway Realignment, Phase 1B-1, Lahainaluna Road to Hokiokio Place, District of Lahaina, Island of Maui

Project No.: NH-030-1(38)

BACKGROUND

Project Location. Honoapiilani Highway, vicinity of Lahainaluna Road to Hokiokio Place

SCOPE OF SERVICES

Assist the Hawaii State Department of Transportation's (HDOT's) Highway Division in construction support services for this project. Project will require weekday + overtime and possibly night and weekend work.

STAFFING NEEDS

HDOT requires the Consultant to provide one construction engineer (equivalent to State Highways Engineer IV), two construction inspectors (equivalent to State Highways Construction Inspector III and Inspector IV), and one office clerk (equivalent to State Highways Clerk IV) to assist the Highways Division during the construction of this project. The above is an estimate of the required manpower. The State reserves the right to adjust the manpower requirements as necessary during the project duration.

REQUIRED EQUIPMENT

Vehicle
Cellular Phone
Computer
Color Printer/Fax/Copier/Scanner
Digital Camera

METHOD OF PAYMENT

Agreed Rates of Pay for labor and equipment.

Total Construction Time:	28 months
Anticipated Start of Construction:	October 2010

GUIDELINES FOR PREPARING CONSULTANT PROPOSALS FOR HIGHWAYS DIVISION PROJECTS

The purpose of these guidelines, developed by the Department of Transportation (HDOT) - Highways Division, is to help assure fair and proper evaluation of consultant proposals by standardizing the format and content. This standardized format should reduce the time required for consultants to prepare proposals, and simplify the review process by HDOT personnel.

In order for HDOT's consultant screening committee to evaluate each proposal properly, it is very important each submittal be clear, concise, and prepared in accordance with the recommended format. Please tab the various sections in the submittal for easy reference. A maximum total of 100 points is available for each proposal. Available points, and allowable pages, for each section are indicated in the following table.

PROPOSAL FORMAT REQUIREMENTS

The proposal shall be limited in length as shown below:

Criteria	Points	Max. No. of Pages
Introductory letter, number of years in business, references and office locations		2
Experience and professional qualifications relevant to the project.	31	2
Past performance on projects of similar scope for public agencies or private industry, including corrective actions and other responses to notices of deficiencies.	30	2
Capacity to accomplish the work in the required time.	29	2
Anticipated concepts and alternative methods for furnishing the required services.	10	2
MAXIMUM TOTAL	100	10
Appendix: Resumes of key personnel		1 pg/person Max.
Appendix: Company Brochure (optional)		

The number of pages per consultant proposal must not exceed the number of pages per criteria, or the maximum total indicated in the table above. The title page, table of contents, tabs, and appendices are excluded from the maximum total pages. A page is considered to be letter size, printed on one side, single-spaced, with characters no smaller than 12 point (Times New Roman font, or similar, preferred). Any proposal exceeding the maximum page limit receives a 5-point penalty for each page over the limit.

After the selection letter has been received by the consultant, any change in key personnel or sub-consultants will require written approval by the State.

PROPOSAL EVALUATION CRITERIA FOR CONSTRUCTION MANAGEMENT/CONSTRUCTION SUPPORT (CM/CS) SERVICES

The criteria presented below will be used for evaluating proposals from interested consultants. The consultant receiving the highest total score will be the top ranked consultant for the project. If the total score of two or more firms are equal, past performance will be the governing criteria.

1. Experience and professional qualifications relevant to the project.

If a construction engineer is required, the construction engineer shall be experienced in managing the construction of projects of similar nature and scope, and shall be a professional engineer licensed in the State of Hawaii.

If a construction inspector is required, the construction inspector shall be certified by the Highways Division's Materials Testing and Research Branch.

Resumes of the construction engineer and/or construction inspector must be included in the proposal.

2. Past performance on projects of similar scope for government and public agencies, or private industry, including corrective actions and other responses to notices of deficiencies.

The consultant shall include a list of similar construction projects that the consultant successfully managed and/or inspected. The list should identify the following:

- Project name, location, year completed and scope
- Contact name and phone number
- Successful project elements
- Project challenges and how they were overcome
- Lessons learned that can be applied to this project

3. Capacity to accomplish the work in the required time.

The consultant must demonstrate that sufficient knowledgeable staff is available, experienced, and capable of performing the work.

The consultant proposal shall contain a list of current HDOT projects. The list should identify the following:

- Project name and location
- Start date and estimated completion date
- Key team members proposed for this project presently assigned to a current project

4. Anticipated concepts and alternative methods for furnishing the required services.

The consultant shall indicate any anticipated concepts and alternative methods that would be used to perform the required services. Proposals should include anticipated concepts to complete the project, and should present any modern and/or cost-effective methods or special project related techniques that would benefit the project.

In accordance with the Brooks Act (U.S.C., Title 40, Chapter 11, Section 1103), written or verbal discussions will be conducted by HDOT after proposals are received.
